Description:

This course is designed for employees who perform work while on a suspended scaffold. The curriculum covers the suspended and supported systems and emphasizes the safety systems for those workers operating a suspended scaffolding. The course includes hands-on training, basic fall arrest, safe operation of a suspended scaffold, and an introduction to suspended scaffold support systems. The course has a 3-year certification.

Participants who complete the course will receive wallet cards provided by the SAIA through Vertical Access Ltd. showing successful completion of the training material.
