REDUCE TURNOVER BY INVESTING IN YOUR EMPLOYEES!

Turnover rates within the construction industry are among the highest of all industries. With the cost of losing an employee averaging 16 to 20 percent of their base salary, how can you afford not to do what you can to keep good workers from jumping ship?

The opportunity for career development is one of the top attractions for jobseekers and a retention strategy tool for getting employees to stay. Offering your current employees the tools to advance their careers could, in fact, decrease your turnover rates, which means you'll be spending less time and money replacing them. They will see that you care about their futures and are willing to invest in their professional growth.

That's where the [The Leadership Academy](#) comes in. This exciting two-day course is designed to develop your management and leadership potential. Course participants will gain the knowledge, skills, and abilities necessary to become more effective managers and inspirational leaders. For questions, please call [Jackie](#) at 816.595.4843.
